Education

University of Illinois Urbana-Champaign Aug 2022 – May 2026

Bachelor of Science in Data Science & Information Sciences with a Computer Science Minor *GPA 3.85/4.00*

Honors: James Scholar and UIUC iSchool Scholarship Recipient

Exchange Study: University of Melbourne and Nanyang Technological University *2024 - 2025*

Experience

Cloud Engineer Intern Jun 2025 – Present

Prolaio | Cloud Engineering Team *Chicago, IL*

- Designed and deployed a GitLab CI/CD automation pipeline using Python and Docker, which enabled automated downstream updates for all dependencies & microservices and cut manual deployment tasks.
- Led Renovate Bot integration across cloud repositories to automate and secure dependency management workflows.
- Authored modular automation scripts adopted by the Cloud Team for more scalable and maintainable version releases.

Software Engineer Intern Jan 2025 – May 2025

Bumpups | Prompt Engineering Team *Dallas, TX*

- Designed & optimized prompts using DSPy to improve LLM fine-tuning efficiency & model performance across use cases.
- Developed data preprocessing pipelines and evaluation scripts, achieving 90% alignment with targeted output behaviors.

Software Engineer Intern Aug 2023 – Jun 2025

Illini Media *Champaign, IL*

- Develop & maintain backend systems (Flask, Next.js, PostgreSQL, APIs) to optimize publication workflows by 45%.
- Implement role-based access controls and security protocols to ensure data integrity and platform security.
- Optimize database operations and automate workflows through CI/CD pipelines, improving system efficiency.

Project Manager Intern & Fullstack Developer Intern Jul 2024 – Dec 2024

University of Melbourne C-Lara Lab *Melbourne, AU*

- Led a 5-member Agile team to develop a web application for reinforcement learning experiments, conducting prompt engineering to enhance AI-driven Chain of Thought reasoning and enable real-time decision-making.
- Architected the full-stack solution using Django, PostgreSQL, and React and integrated custom APIs.
- Automated deployment to Google Cloud with a CI/CD pipeline (Docker, GitHub Actions), cutting manual work by 85%.

Research Assistant - Data Engineering Aug 2023 – Present

UIUC Center for Health Informatics | Supervisor: Ian Brooks (UIUC) *Champaign, IL*

- Ensured data integrity by eliminating inconsistencies across 25,000+ bilingual patient records using Python & R.
- Conducted exploratory and statistical analysis to generate novel insights into Pneumococcal Vaccine effectiveness.

Data Engineer Intern Jun 2021 – Mar 2022

VietAI Research | Supervisors: Thang Luong, Trieu Trinh (Google DeepMind) | research.vietai.org/mtet *San Francisco, CA*

- Scraped and preprocessed 30,000 medical journals using Selenium, boosting NLP model accuracy by +3.5 BLEU.
- Optimized data pairing with quality controls, enhancing English-Vietnamese translation performance.

Projects

Melbourne Real Estate & Prediction | *Python, Spark, GeoPandas* | GitHub Oct 2024 – Dec 2024

- Developed a predictive real estate investment tool by scraping 12,000 properties with a Python pipeline, enriching them with OpenRouteService APIs, and using Spark to process the data and model housing prices.

New York Taxi Analysis & Prediction | *Python, Spark* | GitHub Jul 2024 – Oct 2024

- Engineered a predictive model for NYC taxi fares using Spark that achieved 94% R-squared, leveraging geospatial/temporal analysis and feature engineering to reduce travel costs by 65%.

Skills

Programming Languages: Python, C++, SQL, JavaScript, Java, HTML/CSS
Frameworks & Libraries: Django, React.js, Node.js, Flask, NumPy, Pandas, Plotly, Matplotlib, PyTorch
Tools & Platforms: Docker, Google Cloud/AWS, Git, CI/CD Pipelines, MySQL, PostgreSQL, Apache Spark, Jupyter Notebook, Google Colab, Kubernetes, Power BI, Unity
